## **DETAILED ACTION**

### **Drawings**

The drawings have been approved by the examiner.

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Claim 5 is claiming dependency on claim 4, however, claim 4 is cancelled, and limitations of claim 4 is added to claim 1. Dependency of Claim 5 is corrected to claim proper dependency on claim 1.

The application has been amended as follows:

### **Claim 5**

A process according to claim 1, wherein the menu includes menu points to initiate transfer options at the subscriber's terminal unit wherein said transfer options are

selected from a group consisting of: direct transmission; disruption of the transmission; transmission cost options; and data storage.

### ***REASONS FOR ALLOWANCE***

The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention is directed to transmission of data from a server to a subscriber over a wide area network wherein plurality of intermediary transmission nodes are involved for the transmission. Prior to the transmission of data to the subscriber, a protocol element with the identified pending volume data and pending transmission cost value is used. As this protocol element passes through plurality of intermediary node, each intermediary node supplements as needed the pending transmission cost stored in the protocol element by a cost said each intermediary node will charge for the transmission of data. When said protocol element finally arrives at the terminal node of the subscriber, said terminal node evaluates the values stored in the protocol element, and displays the total pending cost to the subscriber. Data is transmitted to the user only when the subscriber accepts the pending transmission cost.

Prior Art teaches concept of transmission for data from server to the terminal of a subscriber over a wide area network through plurality of intermediary nodes. Prior art also teaches the concept of displaying the cost of transmission of data to subscriber

upon request by the subscriber, or before the transmission of data to the terminal of the subscriber.

Prior art does not teach concept wherein each of the intermediary node adding their cost of transmission to the pending transmission cost stored in a protocol element of data through the intermediary node, which is processed by the terminal of the subscriber and displayed to the subscriber prior to transmission of the data to the subscriber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NARESH VIG whose telephone number is (571)272-6810. The examiner can normally be reached on Mon-Thu 7:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached on (571) 272-6812. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
